Automatic Telephone Payment

Cyneric + Asterisk

 Premier + VoIP Billing + Network QoS platform & services

Your Total Billing & Network Partner Solution

Asterisk Billing Platform

Cyneric.com offers a complete VoIP billing solution customized to your business model, fully integrated with Asterisk.

- Full integration with production Asterisk
- Real time customer definition, authentication, accounting
- Centralized operations : customers, rates, routing
- Virtual DID, Call forwarding, web callback, sms callback, voicemail, fax applications, etc

Application uses with Cyneric VoIP Billing

Automatic Telephone Payment

Using Asterisk and Cyneric VoIP billing, you can have an automated payment system.

Your customer will be able to pay their invoices or add credit to their account just calling to the automated payment system.

The system will also authenticate the credit cards in real-time, with third party payment gateway. Automated payment can integrate with 50 different payment gateways (Verisign, authorize.net, 3com, etc)

Use

- Customer calls to access number
- Payment system recognizes the ANI, to identify customer
- System informs the amount due, in case of postpaid customer
- System requests the amount to pay, in case of pre-paid customer
- Customer enters the amount, and the payment method: credit card or baucher
- System offer to pay with last credit card used, or to enter a new credit card
- Payment system authenticates the transaction in real time, and inform the customer the result
- When transaction is complete, system will insert a payment into the billing
