**Your Total Billing & Network Partner Solution**

# Asterisk Billing Platform

**Cyneric.com** offers a complete VoIP billing solution customized to your business model, fully integrated with Asterisk.

- Full integration with production Asterisk
- Real time customer definition, authentication, accounting
- Centralized operations : customers, rates, routing
- Virtual DID, Call forwarding, web callback, sms callback, voicemail, fax applications, etc

# Application uses with Cyneric VoIP Billing
**SMS Callback**

SMS Callback is an add-on product, offered by Cyneric Voip Billing and asterisk. Your Customer will be able to send an SMS text message to Cyneric SMS server with information of destination number and the number to be reached.
Cyneric VoIP Billing will receive this information, look up the customer on the billing, authenticate the destination number, and send a request to Asterisk server.
Asterisk will receive this information, generate an outbound call to destination number, generate an outbound call to customer number, and conference them. Your customer will be charged for this calls, and will have the option to call any destination, from anywhere.

Use
- Customer sends an SMS to Cyneric Billing, with destination number and number to be reached in
- The requirement is sent to Cyneric Billing platform
- Billing will authenticate the request: customer balance, destination authorize, etc
- After authentication, billing will send a request to asterisk, to generate outbound calls
